The following table shows the results of the regression analysis for the dependent variable "Customer Satisfaction" (Y) and the independent variables "Service Quality" (X1), "Price" (X2), and "Brand Reputation" (X3). The model is represented by the equation: $Y = a + b_1X_1 + b_2X_2 + b_3X_3$.

Variable	Regression Coefficient (b)	Standard Error (SE)	t-statistic	p-value
Intercept (a)	1.2	0.3	4.0	0.000
Service Quality (X1)	0.8	0.1	8.0	0.000
Price (X2)	-0.5	0.1	-5.0	0.000
Brand Reputation (X3)	0.3	0.1	3.0	0.001

The regression analysis indicates that Service Quality (X1) has a positive and significant impact on Customer Satisfaction (Y), while Price (X2) has a negative and significant impact. Brand Reputation (X3) also has a positive and significant impact on Customer Satisfaction (Y).
